//(used if a resource is not found in the page,
// app, or any theme specific resource dictionaries)
)]

// Version information for an assembly consists of the following four values:
//
//      Major Version
//      Minor Version
//      Build Number
```

```
//      Revision
//
// You can specify all the values or you can default the Build and Revision Numbers
// by using the '*' as shown below:
// [assembly: AssemblyVersion("0.14.0.01")]
[assembly: AssemblyVersion("0.14.0.01")]
[assembly: AssemblyFileVersion("0.14.0.01")]
```
